

**2024-25 IAABO CREW OF THREE (Co3) FLOOR MECHANICS/SIGNALS EXAMINATION**  
 (All Questions are based on the IAABO Crew of Three Officials' Manual)

Please read each statement carefully and indicate whether the official is correct by answering "Yes" or "No."			
1. When administering throw-ins, both the Lead and Trail should "double the sideline," taking positions on the same sideline, on the strongside of the court.	1.	Yes	No
2. During pregame warm-ups, U2 observes the home team.	2.	Yes	No
3. Any illegal uniform issues that officials observe during pregame warm-ups should be addressed directly with the offending player.	3.	Yes	No
4. In transition, the Lead should ideally be ahead of the ball and the play. The Lead should keep the players and the court in their field of vision by looking over their inside shoulder as they move toward the end line to become the new Lead.	4.	Yes	No
5. The Lead should avoid initiating a rotation until all players and officials are in the frontcourt.	5.	Yes	No
6. Unless the Center is initiating a rotation, it is recommended that they position-adjust only one or two steps above or below the free-throw line extended.	6.	Yes	No
7. On drives from the Center's side of the basketline, the Center has primary coverage on block/charge plays involving a primary defender.	7.	Yes	No
8. As the ball advances from backcourt to frontcourt with defensive pressure, the Trail should be slightly behind the ball to maintain an open look between the ball handler and primary defender.	8.	Yes	No
9. The Trail should not retreat in anticipation of transition, nor move in transition from the Trail to the Lead position with their back turned to the play.	9.	Yes	No
10. The Trail and Center must mirror all successful three-point goal signals.	10.	Yes	No
11. Double/multiple whistles should generally only occur where coverage areas intersect and overlap.	11.	Yes	No
12. After a held ball is ruled, the official facing away from the table should turn around toward the scorer's table to determine the direction of the alternating-possession arrow.	12.	Yes	No
13. When the crew needs to conference to discuss a ruling, the officials should maintain visual coverage of the players and bench areas while they confer.	13.	Yes	No
14. On last-second tries, it is imperative that the primary official signal a three-point try, but not give the successful three-point goal signal unless they are responsible for the last-second try.	14.	Yes	No
15. Between quarters, U1 and U2 take positions on the first lane space mark, opposite the table.	15.	Yes	No
16. To begin the second half, U2 goes to the table to retrieve the ball for the Referee and assumes the Center position in the frontcourt.	16.	Yes	No
17. If an injured player does not appear to require immediate attention and a scoring attempt is in progress, officials should allow play to continue until that team is no longer attempting to score.	17.	Yes	No
18. The wide triangle concept outlines optimum court coverage and positioning for the crew.	18.	Yes	No
19. In transition, when the ball is advancing on the opposite sideline, the Lead's initial starting position should be wide on the end line, at the A position.	19.	Yes	No
20. The Trail should avoid being positioned in the area between 28-foot mark and the division line, unless it is necessary to get an open look between a match-up in their PCA.	20.	Yes	No
21. The Trail and Center should attempt to "get under shooters" as much as possible, to obtain an open look between offensive and defensive players.	21.	Yes	No
22. The Lead has primary coverage on plays in the lane area involving a secondary defender.	22.	Yes	No
23. During press coverage, the new Lead takes a position one or two steps nearer to the end line than the deepest player, keeping all players within the wide triangle.	23.	Yes	No
24. As the ball moves toward the basketline, the Lead mirrors the ball, closing down toward the B position. The Lead may initiate a rotation when the ball crosses the basketline.	24.	Yes	No
25. If the Lead cannot complete a rotation before the ball reverses back to the Lead's original side of the basketline, the Lead should "back out," returning to the B position.	25.	Yes	No
